DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Khorrami (U.S. Patent number 5,970,393).

Regarding claim 1, Khorrami discloses an antenna of an electronic device comprising:

a case (Fig. 3);

a wireless transmission/reception module (504, 506, 511) mounted in the case;

an actuation member (506) disposed on a surface of the case, the actuation member being operative to control an activation of an element mounted on the case; and

an antenna module (502) having a portion disposed in the actuation member, the antenna module being interconnected one projecting end of the actuation member and the wireless transmission/reception module (Figs. 3A-10, col. 4, lines 55-67, col. 8, lines 10-25).

Allowable Subject Matter

2. Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the prior art teaches the antenna of the electronic device wherein the body disposed in the actuation member, the cable having one end coupled to the body, and the connector coupled to the other end of the cable, the connector being adapted to couple to a second connector on the wireless transmission/reception module.
